

## LYRIX TO DEMO MOBISO AND TALK AT SPEECHTEK 2009

**Lowell, MA – June 16, 2009** - Lyrix, Inc., a leading provider of complete speech enabled collaboration solutions for mobile and distributed enterprises will be participating in SpeechTEK 2009, August 24-26, 2009 in New York City. The showcase will focus on Speech in the Enterprise.

Lyrix will participate in the Voice-Enabled Enterprise Demo Session giving a sneak preview of the Mobiso 6.0 solution. From BlackBerry and Web, mobile business users download the Mobiso application and immediately sync. contacts, social networks, and corporate addressbook entries with the powerful Cloud Based Mobiso intelligent addressbook. Once synced., simply call Mobiso and through voice recognition: call, send a message, and conferencing your colleagues and teams hands free.

In addition to the Demo session, Lyrix will also be presenting: "Welcome to the Numberless Enterprise - Save Your Thumbs!" A discussion of how to solve the increasing problems facing IT/Telecom managers when it comes to more and more mobile workers needing a better way to manage efficiently corporate, personal, and social contacts from their mobile phones.

Stewart Hampton, Director of Sales & Marketing at Lyrix commented: "Lyrix is looking forward to demonstrating how Speech and the Intelligent Addressbook can solve real world business problems and save money. We'll cover examples and key lessons from the real world, as well as review new technologies emerging in the "Intelligent Addressbook" space intended to help mobile workers more effective and the IT staff that support them more empowered.

Mobiso 5.2 is available for free trial at [www.mobiso.com](http://www.mobiso.com). Businesses can create or upload a phone directory and play with the great Mobiso features for themselves.

### **About Lyrix, Mobiso and PeopleFind**

Mobiso is a cloud-based service for enterprises built upon Lyrix's PeopleFind technology. PeopleFind, a cloud-based intelligent address book, is a combination of speech engines, proprietary software logic, and proprietary Day2 linguistic services. PeopleFind software is licensed to OEM partners as a foundation for their speech products. Mobiso combines PeopleFind with partner technologies, such as Alcatel's MyTeamwork, Funambol, and Gotvoice to provide a cloud-based speech assistant helping mobile workforces better connect and collaborate in the "numberless enterprise"®.

Mobiso is an enterprise grade collaboration solution without the sticker shock. Pay as you go for only what you need. Getting started is easy. Send us your phone list and we'll set you up with a phone number and secure web login. For more information please go to: <http://www.mobiso.com>
